BRUDER

EXP-7

MEET THE BRUDER EXP-7

Embark on an adventure with the ultimate hybrid expedition trailer. The EXP-7 offers the flexibility of a unique indoor/outdoor kitchen combination, seamlessly allowing you to connect with nature. Its unique double-door design and features around the entire body provide a 360-degree camping experience—unlike traditional campers that use only one side. Available in both the pop-top (PT) and hard-top grand tourer (GT) models, the deliberately sleek EXP-7 can navigate the tightest and roughest tracks. The EXP-7's 48V electrical system also takes innovation and true off-grid capability to new heights, offering unparalleled off-grid comfort, convenience, and style.

CHASSIS

The chassis and suspension have been designed to operate in complete symmetry. Our patented design is certified engineered to handle five times the maximum weight of the EXP-7.

PERFORMANCE SUSPENSION

The EXP-7 is designed for exceptional off-road performance, the advanced suspension system provides outstanding travel and stability. With the unique ability to operate safely even when two wheels are lifted off the ground, travel can continue even in the event of an emergency or multiple flat tyres.

CHOOSE FROM GT OR PT

The PT features the exclusive Bruder roof lifting mechanism. You can lower the roof when storing or towing your Bruder and raise it when you reach your destination with a simple press of a button on the Bruder control hub or via your phone.

The EXP-7 GT has a fixed roofline, making it taller than the PT with a higher level of insulation for extreme climates and providing additional storage.

UNIQUE BODY CONSTRUCTION

Our unique epoxy-bonded composite body is certified engineered, offering immense strength and insulation. Built to the highest standards, epoxy resin construction enhances durability and resilience, ensuring reliability in the toughest conditions.

ENGINEERED FOR EXTREME CONDITIONS

Brave temperatures from below freezing in the arctic to blistering desert heat, as well as altitudes exceeding 3,500 meters. Conquer any environment with confidence.

SECONDS NOT MINUTES

With the push of a button, automatically level the trailer and deploy the electronic steps for instant access. The advanced suspension system offers up to 12 inches of travel, ensuring stability on uneven terrain and minimising setup time.

UNMATCHED TOWING EXPERIENCE

The EXP-7 offers up to 90-degree turning angles, making manoeuvring through tight spaces effortless. The dual-axle suspension system absorbs vibrations and reduces stress on the tow vehicle, enhancing stability and ensuring a more controlled driving experience.

TECHNOLOGY MEETS CONVENIENCE

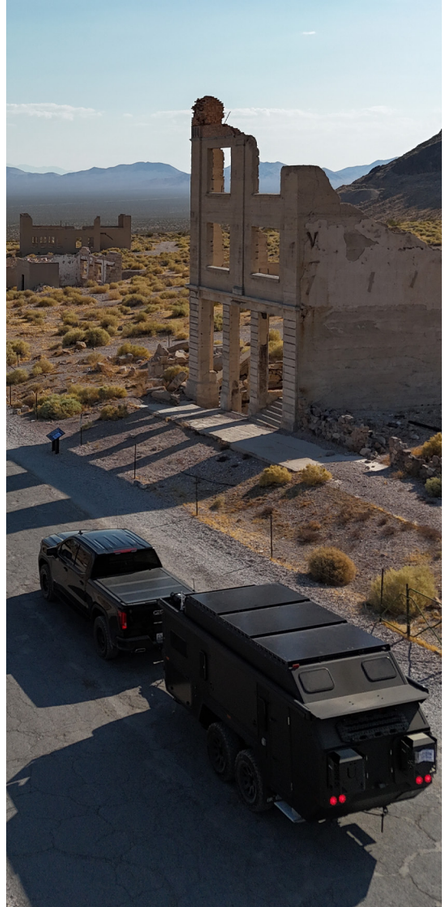

Access all your essentials with a simple touch, thanks to the user-friendly integration of technology within the EXP-7. Effortlessly manage your suspension, climate control, lighting, and monitor the entire trailer's electrical system, all through the digital screen or your mobile phone.

A TRUE OFF-GRID DESIGN

The EXP-7 features a 48-volt system that surpasses traditional 12V setups, delivering superior off-grid capability. A 10 kWh battery comes as standard, offering greater power than a Tesla Powerwall. Paired with 1.2 kW of solar, this advanced energy system ensures exceptional chargeback capabilities and unrivalled power for a trailer of this size.

CONVERTIBLE L-SHAPED LOUNGE

Easily convert your lounge area into bunk beds for added versatility and space-saving convenience, perfect for accommodating children and maximising your living area.

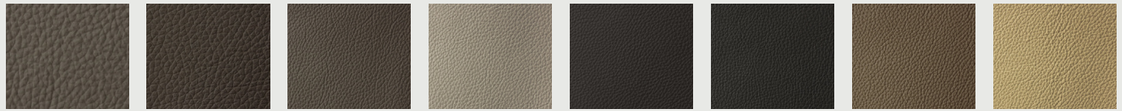

UNPARALLELED CONVENIENCE

Our exclusive two-door design offers direct access to the wet room, a feature only found in Bruder models, providing unparalleled convenience and functionality for your adventures.
