BRUDER

EXP-8

GO FURTHER, STAY LONGER

The EXP-8 is built to take you to the world's most remote destinations while delivering unmatched comfort in every season. Combining luxurious amenities with true off-grid sustainability, it ensures you stay connected to the comforts of home, no matter how far your adventures take you.

THE ULTIMATE OFF-ROAD EXPEDITION TRAILER

Experience the EXP-8: unmatched off-road capability, luxury, and completely self-sustainable off-grid functionality.

ZERO SET UP

Be adventure-ready in seconds. The auto-leveling suspension system with up to 12 inches of travel and electronic steps frees you to spend more time exploring the great outdoors.

EXPLORE ANY TERRAIN IN CONFIDENCE

The EXP-8 suspension is engineered for exceptional wheel travel, maximising performance and capability on challenging terrain.

UNIQUE BODY CONSTRUCTION

Bruder's EXP trailers are built with epoxy-bonded quad weave, a material that far outperforms the traditional adhesives structural integrity and impact resistance. The use of epoxy resin enhances the trailer's toughness and stability, evenly distributing loads and stresses across the body. Notably, the body is independently engineered to maintain its structural strength without depending on the chassis or interior cabinetry for support. This results in an exceptionally durable design, built to withstand extreme off-road conditions and environments prone to impacts, abrasions, and sudden climate changes.

THE ULTIMATE FOUR SEASONS VEHICLE

Designed for long-haul trips in challenging conditions, the EXP-8 enables you to cook, shower, and live comfortably indoors when needed, while still embracing the outdoors whenever convenient.

COOK IN ANY CONDITION

The EXP-8's indoor kitchen lets you cook comfortably in any weather, no matter the conditions outside. With a fully equipped setup, including an induction cook top, sink, and plenty of storage, you can prepare meals with ease while staying protected from the elements.

SUSPENSION

At Bruder, our patented suspension system bridges the gap between a 4WD's capabilities and those of a trailer. With 12 inches of suspension travel, it enables Bruder owners to smoothly navigate bumps and uneven terrain, reaching even the most remote destinations with ease. This extra travel is essential for maintaining stability and minimising the risk of damage to both the trailer and its contents. Whether you're tackling rugged off-road trails or rough terrain, our suspension ensures your journey remains safe, comfortable, and effortless

EXCLUSIVE DUAL DOOR ACCESS

Our exclusive two-door design offers direct access to the wet room, a feature only found in Bruder models, providing unparalleled convenience and functionality for your adventures.

PREMIER WET ROOM

Our market-leading wet room boasts one of the largest shower and toilet areas available, providing ample space and comfort for your convenience and enjoyment.

BRUDER ELECTRONIC ARCHITECTURE

The Bruder EXP-8 is equipped with an advanced 48-volt system, designed to efficiently power high-demand appliances. It integrates smoothly with modern solar panels, optimising renewable energy use. Enhanced battery management ensures faster charging and more stable energy storage, making it ideal for off-grid living.

Compared to the standard 12V system, our 48-volt system offers distinct advantages. The higher voltage results in lower current, reducing energy loss and heat generation in the wiring. This enhances power efficiency while minimising waste. Bruder's electronic architecture and design concepts enable active cooling of the electrical system through the air conditioning system, enhancing reliability and performance in extreme conditions.

Future-proof and fully compatible with evolving technologies, our 48-volt system is designed to seamlessly integrate with increasingly efficient appliances and systems.

ENOUGH BATTERY TO POWER A HOME

With over 30 kWh of available battery power, the EXP-8 has roughly 2.5 times that of a Tesla Powerwall, enough to power most homes - combined with 1.7 KW of solar - the EXP-8 sets the benchmark for off-road and off-grid expedition trailers.

DUAL UNDER BUNK AC SYSTEM

Experience next-level comfort with our dual system, a feature distinct from many competitors. Ensuring optimal climate control, our setup ensures your comfort no matter the conditions.

POSITIVE PRESSURE SYSTEM

Protect against dust ingress with our positive pressure air filtration system.

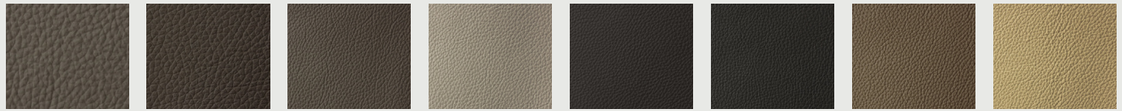

TECHNOLOGY MEETS CONVENIENCE

Access all your essentials with a simple touch thanks to the cutting-edge Garmin technology integrated into our system. Manage your suspension, climate control, and reversing camera effortlessly from one convenient interface.

CONVERTIBLE LOUNGE

Easily convert your lounge into bunk beds for added versatility and space-saving convenience, perfect for accommodating children and maximizing your living area.
